About Me

Software engineer specialized in **full-stack development**, **Salesforce** and **cloud/AI** solutions, with hands-on experience gained through my PFE internship and academic projects. Actively involved in **extracurricular activities** throughout my studies, and I bring **energy**, motivation and a positive attitude to every team I join. Elected **class delegate**, I bring a strong sense of **responsibility** and leadership to every project. Ready to turn my internship experience into long-term impact – looking for a first full-time role where I can keep learning fast and contribute from day one. **Polyglot**: French, English, Arabic and Turkish.

Professional Experience

Salesforce Consultant & Developer Intern – D&A Technologies — Casablanca, Morocco

February 2026 – August 2026

- Contributed to the **Study and Development of a Purchasing Information System** project, designing and building a quality-driven Procure-to-Pay system for an enterprise client and modeling business processes with **BPMN** within a Salesforce consulting firm.
- Developed backend logic, approval workflows and **Lightning Web Components (LWC)** using **Apex** and **SOQL**, delivered supplier-facing features on **Experience Cloud**, and contributed to **unit and integration testing** in an **Agile** environment.

AIOps & Automation Intern – PROVIROLL — Paris, France

July 2025 – September 2025

- Built the **Twitter Automation Agent**, an AI agent automating content creation and posting on Twitter/X, using **ElizaOS** to orchestrate agent behavior and integrate the Twitter API.
- Used **snscrape/Tweepy** to collect and build tweet datasets, and **Hugging Face** NLP models for coherent, context-aware content generation.

Full-Stack Developer Intern – LUMINALINK — Rabat, Morocco

July 2024 – August 2024

- Developed the **Coffee Shop App**, a full-stack, serverless coffee ordering system on **AWS** with an Angular frontend.
- Implemented backend logic with **AWS Lambda**, REST APIs with **API Gateway**, NoSQL storage with **DynamoDB**, and static hosting with **S3**.

Technical Skills

Programming Languages: C, C++, C#, Java, Python, SQL, HTML, CSS, JavaScript, Apex

Salesforce: Salesforce Platform, Apex, Lightning Web Components (LWC), Experience Cloud, SOQL, Flow Builder

Frameworks and Libraries: Spring Boot, Spring Data JPA, .NET, React, ReactJS, Node.js, Django, Bootstrap

Cloud and Integration: AWS, Azure, MuleSoft, REST APIs, API Gateway, AWS Lambda, DynamoDB, S3

Databases: MySQL, Oracle, Firebase, H2, NoSQL, SOQL

DevOps and Infrastructure: Docker, Kubernetes, Jenkins, ArgoCD, Ansible, Git, GitHub, CI/CD, Prometheus, Grafana, Proxmox, pfSense, ESXi

Methodologies: Agile, Scrum, Kanban, BPMN

Soft Skills: Teamwork, Adaptability, Communication, Problem Solving

Academic Projects

Microservices E-Commerce Platform — *January 2026*

- Built a microservices-based e-commerce platform using **Spring Boot**, **Spring Data JPA**, Eureka, Spring Cloud Gateway and Spring Cloud Config.
- Implemented fault tolerance with Hystrix and developed the frontend using **ReactJS**.

Banking Management Application — *December 2025*

- Built a full-stack banking application for client, account and transfer management using **Spring Boot**, REST APIs and **Spring Security + JWT**.
- Used **Spring Data JPA**, H2, ReactJS and Axios for data persistence, authentication and frontend development.

CI/CD Pipeline Automation — *October 2025*

- Implemented a CI/CD pipeline using **Kubernetes (Minikube)**, **Jenkins** and **ArgoCD** for automated deployment and scaling.
- Used **Docker**, GitHub, Prometheus and Grafana for containerization, version control, monitoring and visualization.

Healthcare AI – Predicting Patient Survival — *July 2025*

- Developed a web interface predicting patient survival probabilities from medical data using machine learning and deep learning models.
- Used **Scikit-learn**, **TensorFlow**, **Streamlit**, **Power BI** and ETL for machine learning, visualization and data processing.

Recommendation System – E-commerce Platform *June 2025*
- Built a recommendation engine combining collaborative and content-based filtering for product suggestions.
- Used **PySpark, MLlib and ALS** for collaborative filtering and Kafka/Elasticsearch for real-time indexing.

Tech Store – JEE Website with JDBC Architecture *May 2025*
- Developed an e-commerce platform with authentication, CRUD operations and product search.
- Used **Jakarta EE (JEE)**, JDK 17, Tomcat 10, servlets and JDBC.

Movie Management System *2025*
- Developed a web platform for managing movies and actors with full CRUD functionality.
- Used **C# (.NET)**, SQL, React and Vite for backend, database and frontend development.

Online Taxi Reservation System *June 2024*
- Developed a platform for online taxi booking with authentication and ride management.
- Used **Django**, HTML/CSS and SQL for backend, interface and data management.

Education

École Marocaine des Sciences de l'Ingénieur (EMSI) **2021 – 2026**
Master's / State Engineering Degree in Computer Science and Networks

Lycée Abderahim Bouabid **2020 – 2021**
High School Diploma in Sciences

Certificates and Training

- **MuleSoft** – Salesforce 2026
- **Intermediate Administrator** – Salesforce 2026
- **Beginner Administrator** – Salesforce 2026
- **Intermediate Developer** – Salesforce 2026
- **Lightning Experience Basics** – Salesforce 2026
- **Flow Builder** – Salesforce 2026
- **Oracle Database 19c Admin Professional Credential** – Oracle 2025
- **Software Engineering: Software Design, Management** – Hong Kong University 2025
- **Building Functional Mockups and Low-Fidelity Prototypes** – Google 2025
- **Introduction to Containers with Docker, Kubernetes and OpenShift** – IBM 2024
- **React Basics** – Meta 2024
- **Java: Object-Oriented Programming** – University of Pennsylvania 2023
- **C++: Object-Oriented Programming** – University of Pennsylvania 2022
